Restriction Requirement

Restriction to one of the following inventions is required under 35 USC 121:

- I. Claims 1-11 and 22-30 drawn to a method of processing coke and generating electricity classified in Class 60, subclass 772, and
- II. Claims 12-21 drawn to an apparatus for processing coke and generating electricity classified in Class 60, subclass 39.182.

The inventions of Groups I and II above are distinct because the method of Group I could be practiced with apparatus materially different than that of Group II. The claimed method, for example, does not necessarily require two distinct inlet devices or means for introducing refinery offgas and uncalcined coke into a combustion chamber. The method could be practiced using a single inlet device to introduce both feedstocks.

Because these inventions are distinct for the reasons given above and require separate classification and/or divergent fields of search, restriction for examination purposes as indicated is proper.

Applicants are advised that even in the event that the restriction requirement is traversed, the response to this requirement to be complete must include an election of the invention to be examined.

In addition to the above division between method and apparatus, further election of individual species is required.

Species Election

This application encompasses two different species of the inventive subject matter as shown respectively in Figures 3 and 4. The different species are independent and/or distinct because they constitute alternative operating methods or apparatus configurations which have mutually exclusive characteristics. Examination of both species would involve an added search and/or examination burden because the different species require divergent search fields and/or the application of different reference material. Pursuant to 35 USC 121, applicants are required for a complete response to (1) elect a single disclosed species and (2) list all claims readable on the elected species including any claims subsequently added (MPEP 809.02(a)).

Claims 1, 12, 14 and 22 appear to be generic.

Applicants are further advised that a mere argument alleging that a generic is allowable will not satisfy a species election requirement. For a complete response, applicants must elect a single species and list the claims readable on that species as set forth above. (The combined division and species election requirement would make election by telephone difficult, and hence, applicants have not been offered the option of a telephone election in this instance.)
